

# Distinctive Lighting

FOR EXTERIORS

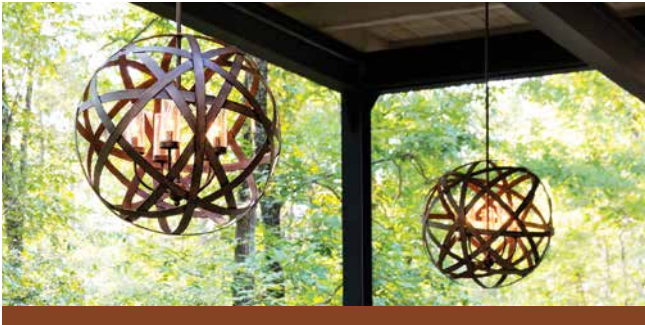

*Welcome to one of the most comprehensive and design driven collections of lighting for outdoors.*

With over 400 different designs and 100 styles to choose from across a broad selection of sizes, there is an option for all applications, including lifestyle models for outdoor living spaces.

All of these products offer detail in design and quality in manufacture, with many models featuring materials and finishes that allow us to give enhanced product warranties. This includes products for the severest ocean facing locations with materials that can withstand the harshest of conditions.

## *OUTDOOR LIVING*

For the first time, we have brought together a series of dedicated products for outdoor living spaces, aimed to enhance and bring the indoors outside. More and more people, whether at home or in a hotel, bar or restaurant, enjoy being outdoors to eat, relax and spend social time together. Our Outdoor Living models offer new lighting options such as Outdoor Chandeliers to bring new life to these locations.

## *COASTAL*

Planet earth is covered by more than 70% ocean, and has more than 620,000 miles of coastline. With a 3.5% content of salt in seawater, and with coastlines often accompanied by extreme temperatures, sun and high winds, it is no surprise that coastal damage due to saline conditions is one of the major outdoor lighting challenges in such locations. This Coastal range delivers solutions that use materials with this very much in mind. Robust, rust resistant and UV stable to resist the harshest of climates, these fittings combine technical competence with design, style and variety.

## *LED LAMPS*

The majority of our outdoor fittings use E27 or E14 lamp-holders, which makes them suitable to use retrofit LED lamps. Our range offers an LED lamp solution for every such fitting in this catalogue. Using the latest LED filament technology, these energy efficient lamps offer good lumen output, look stylish with their retro vintage influences, yet run at a cool temperature and have a 25,000 hour life expectancy.

# OUTDOOR LIVING

It has become a popular trend to extend home living areas into gardens, patios and verandas. We have a number of more decorative IP44-based solutions that help to bring the inside outdoors. Either by using chandeliers or nesting multiple pendants over tables or seating areas, great style can be brought to these outdoor leisure areas.

# TRANSITIONAL

Transitional describes designs that derive from classic styles but have been conceived with a contemporary edge. Transitional lanterns are less ornate than their classic counterparts, but aren't as streamlined or minimalist as modern styles. They combine the best of both worlds for a clean, comfortable look wherever they are placed.

25706

# AMERICAN TRADITIONAL

Typically larger in scale and more detailed in design, the lanterns in this collection are almost entirely designed in North America, originally for the typical American style home. These fittings, often influenced by original European styles, bring more presence to where they are used, suiting both residential and hospitality situations.

# COUNTRY TRADITIONAL

This collection features styles influenced from period British and European lanterns from the last century. Although some of these are modern updates made of cast aluminium, others are still hand-made in iron to keep the authenticity. These lanterns are typically smaller in scale to suit picturesque cottages and small town houses.

# COASTAL LIGHTING

The harsh nature of coastal environments challenge many product types that are used outdoors, particularly outdoor lighting. To combat the effects of saline and UV damage, we have brought together a wide collection of models, styles and options that fulfil these challenges without compromise to the design. Using premium materials, these ranges have been designed to resist these harshest of conditions whilst bringing great style to the location used.

## COMPOSITE

- Strong and durable material that is robust in appearance and feel.
- All feature hand-made glass lenses.
- Excellent UV, corrosion and rusting resistance properties.
- Suitable for ocean-facing locations and exposure to the harshest conditions.
- Guaranteed for 5 years.\*

*see pages 136-147*

## POLYMER

- Extremely strong yet lightweight material made in Italy.
- All use impact resistant polycarbonate lenses.
- Embedded colour for enhanced UV, colour and corrosion resistance.
- Suitable for ocean facing locations.
- Guaranteed 20 years.\*

*see pages 148-151*

## BRASS

- Solid high grade brass material used with glass panels.
- Robust yet hand crafted ensuring long life properties.
- Have lacquered finishes that will potentially age in harsh conditions.
- Can withstand ocean-side locations but will age / patina.
- Limited Lifetime warranty.\*

*see pages 152-166*

## MARINE MATERIALS

- Malaysian Teak and 316 stainless steel materials used.
- Robust and weather resistant to the harshest of conditions.
- Natural Teak wood needs maintenance for colour and lifetime protection.
- Non-ferrous supporting components used internally.
- 10 year limited lifetime warranty.\*

*see page 167*

# MODERN

The interpretation of Modern lighting can vary. Designs can be based on anything from updated Scandinavian retro looks, to more clean and straight lined styles inspired by modern architecture. This series includes a mix of both, some incorporating integral LED for low energy consumption. All models suit both residential and commercial applications.

# LANDSCAPE LIGHTING

The Landscape Lighting Collection offers a versatile selection of high quality, easy to install and energy efficient products for all parts of the garden landscape, designed for use by professional gardeners, landscapers and architects.

Using our excellent low voltage plug & go system allows a large number of fittings from these ranges to be connected together over a distance of up to 80 metres. Furthermore, all the fittings within the plug & go series use LED light sources, which have very good light output properties alongside exceptionally low energy consumption. Added to this we offer a complementary range of 220-240V energy efficient models in matching designs as well as range accessories to ensure the widest possible choice.

## PLUG & GO: HOW IT WORKS

Step 1: Choose the areas you want to have lit, then we suggest that you sketch a rough plan view of each area involved.

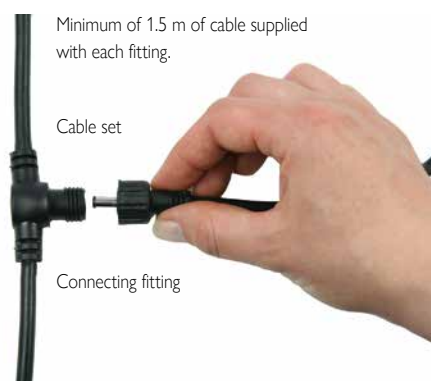

Step 2: Choose the fittings which will suit the requirements and list them out with the quantity of each where relevant. Be careful to bear in mind the voltage of the fittings chosen. All 220-240V fittings will need mains supply to wherever they are to be installed whereas all plug & go models just need to be connected into the low voltage cable (as shown below).

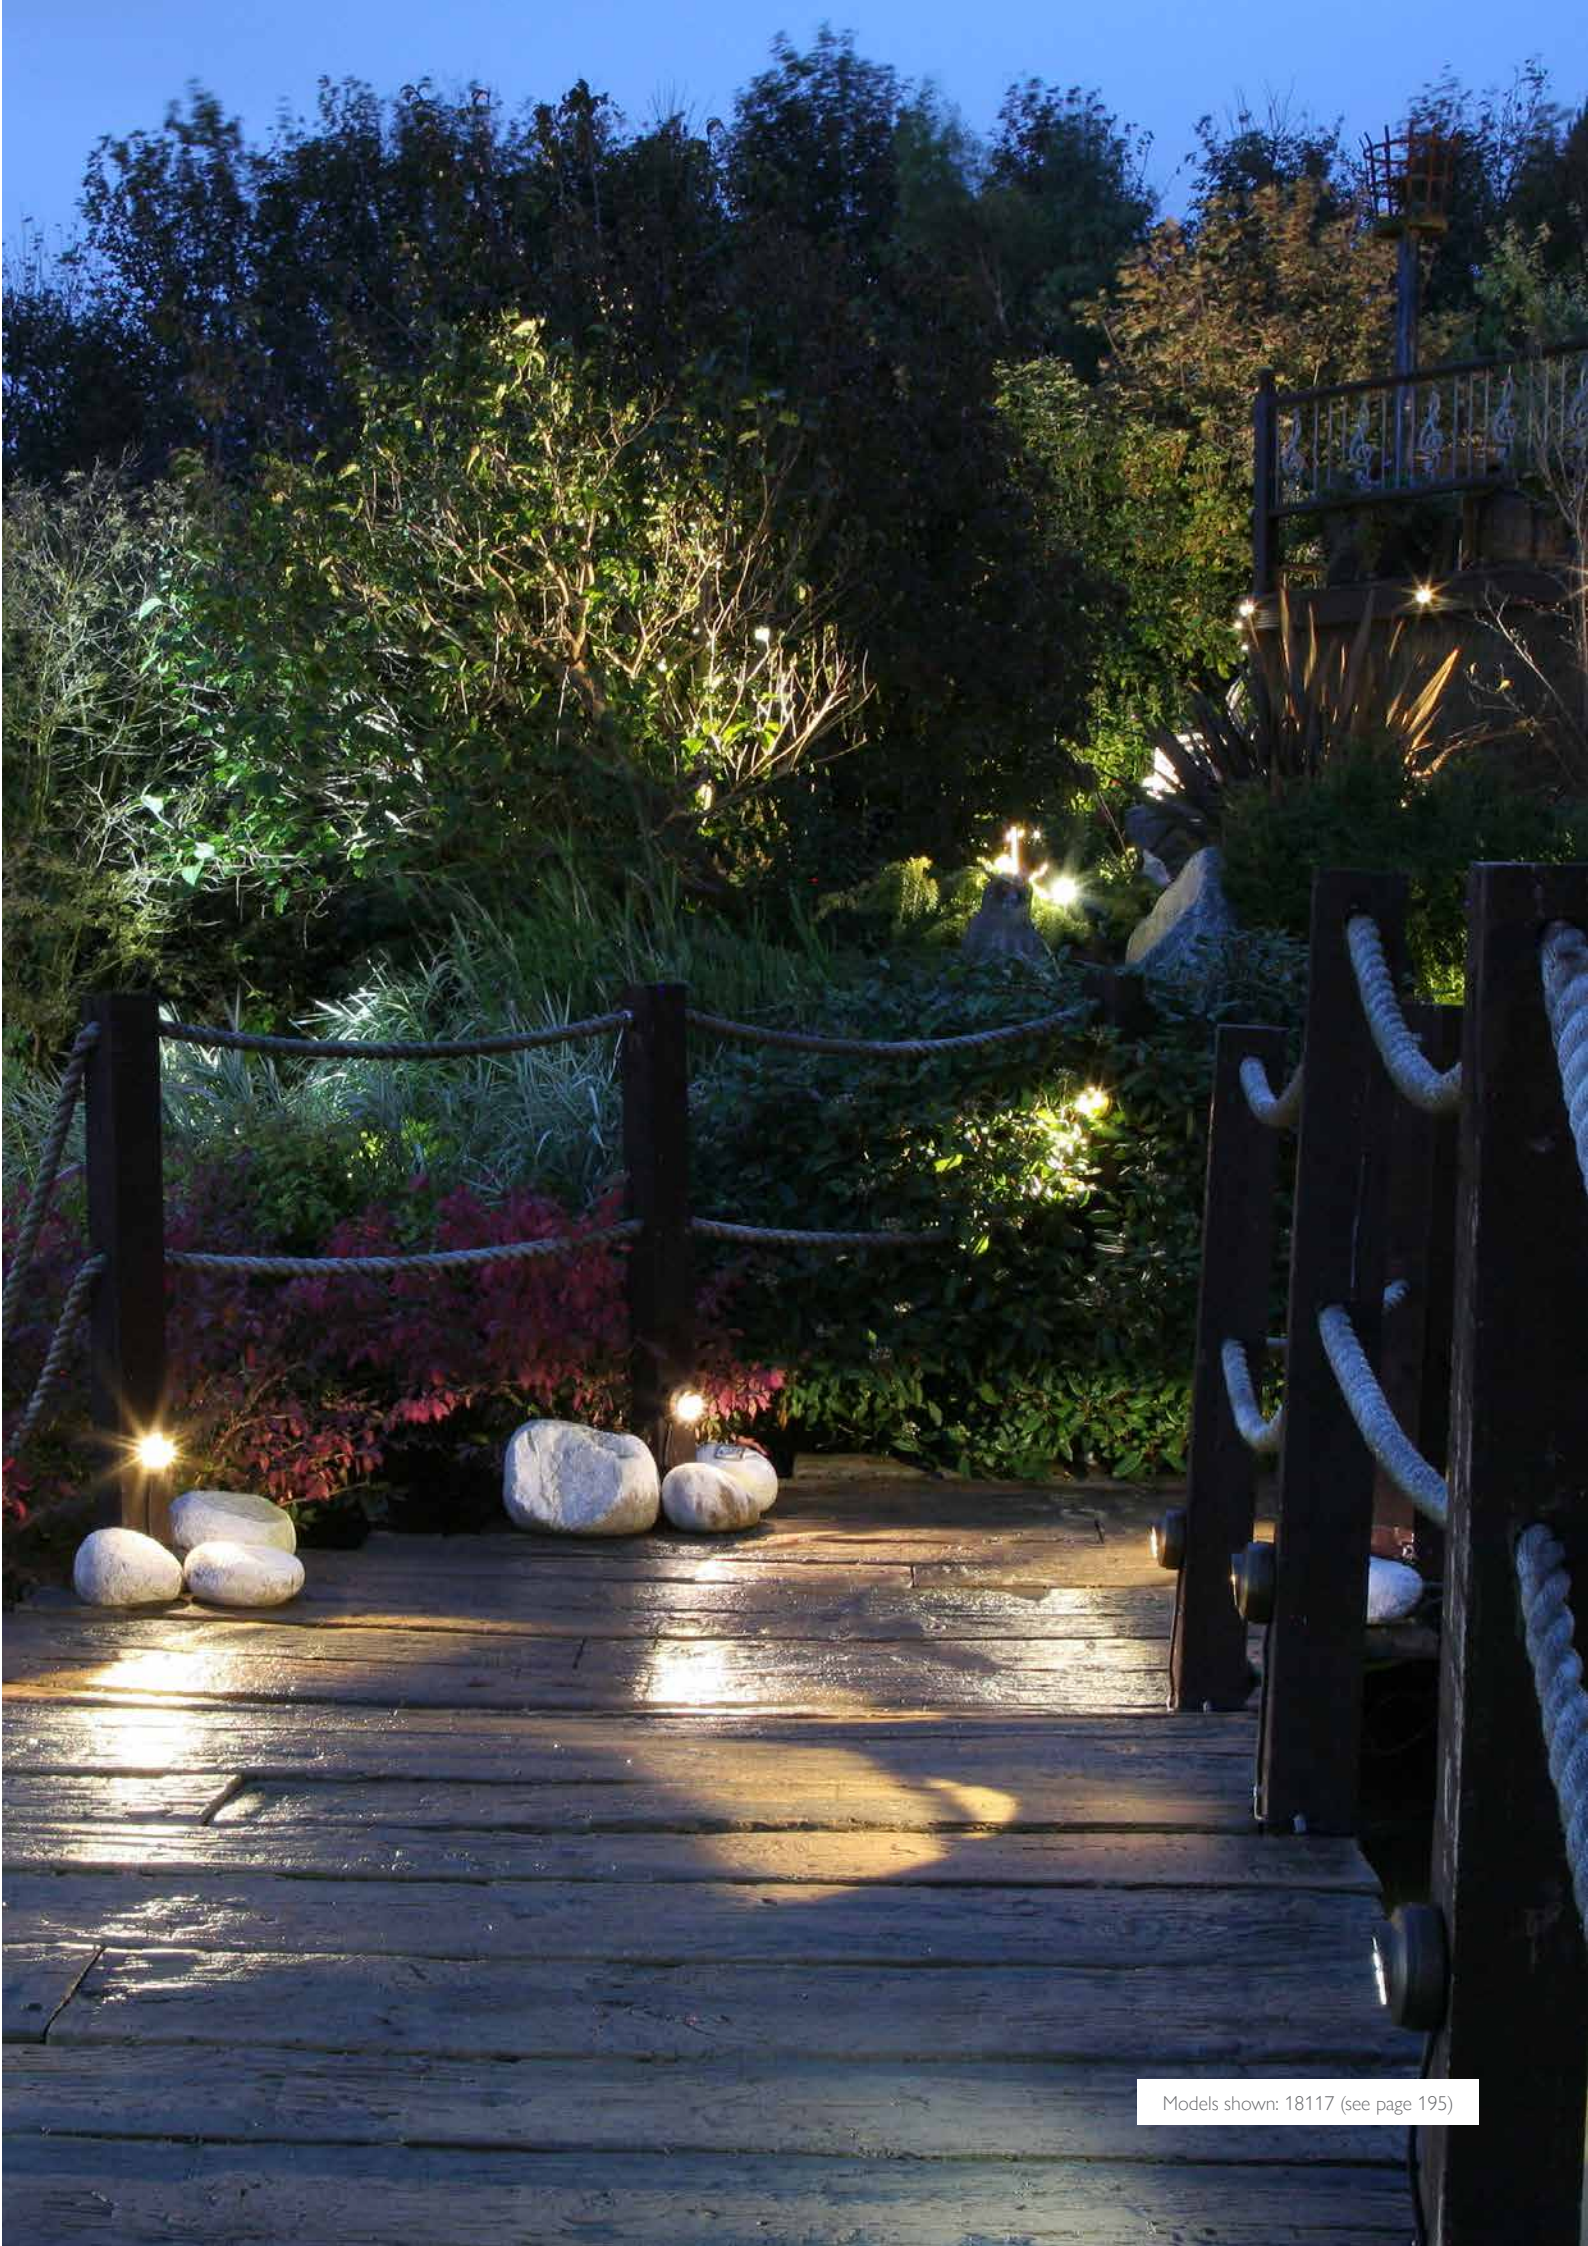

Step 3: Measure the distance involved for the plug & go models chosen and determine, from the cable set options available which cable set or sets will be needed. Remember, up to 80 metres of cable can be used from 1 LED driver but the wattage loading must not exceed the recommended minimum, maximum (see accessories page 209).

Step 4: Plan where the mains supply will originate from. With the plug & go system you have a choice of placing the LED driver/drivers in an IP rated wall box on an exterior wall. However, depending on how large an area is involved, sometimes more than one mains feed may be needed in different locations. Consultation with an electrician is advisable on this matter.

### Important

Plug & go fittings use a unique single pin, 2 pole plug and as such are not compatible with any other product or system. Currently they are not dimmable but they will work when wired via a timer.

18129

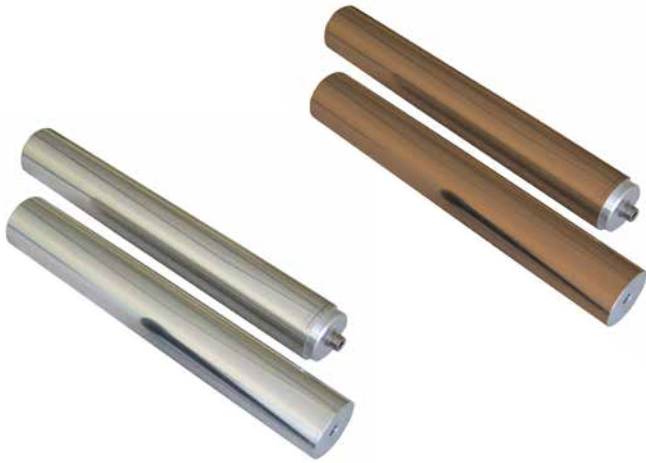

18130

Spotlight Fitting

<b>Product Code</b>	18129 (Anodised Aluminium) 18130 (Natural Brass)	<b>Lumens</b>	300Lm
<b>Material</b>	Marine Grade Aluminium or Solid Natural Brass (Natural brass is untreated and its finish will age over time.)	<b>Beam Angle</b>	35°
<b>Finish</b>	Anodised Aluminium or Natural Brass	<b>Incandescent Equivalency</b>	30W
<b>IP Rating</b>	IP54	<b>Power Supply Requirement</b>	220V-240V
<b>Voltage</b>	12V	<b>Dimmable</b>	Not Dimmable
<b>Light Source</b>	3 x 1W LED	<b>Cabling</b>	1.5m
<b>Colour Temp.</b>	3000k	<b>Optional Lens Accessories</b>	Blue, red, amber or green (for more details see page 208)
<b>Optional Mounting Accessories</b>	For 18129 (see page 208) 18131 - Aluminium Pole 50824 - Black Nylon Spike	<b>Optional Mounting Accessories</b>	For 18130 (see page 208) 18132 - Brass Pole 50824 - Black Nylon Spike

\*Guarantee details on p212.

Pole Accessory	
<b>Product Code(s)</b>	18131 (Aluminium) 18132 (Brass)
<b>Material</b>	Marine Grade Aluminium or Solid Natural Brass
<b>Finish</b>	Anodised Aluminium or Brass
<b>Dimensions</b>	Height: 250mm Diameter: 40mm
<b>Notes</b>	A maximum of three poles can be used together per spotlight fitting.  Natural brass is untreated and its finish will age over time.

Spike Accessory	
<b>Product Code(s)</b>	50824
<b>Material</b>	Black Nylon
<b>Dimensions</b>	Height: 170mm Diameter: 45mm
<b>Notes</b>	This spike is suitable for models: 18129, 18130, and 25015

Fittings 18125-18130 can easily have their lenses changed from the standard clear version to blue, green, red or amber. Simply unscrew the lens cap to easily remove and change for different coloured effects to the surroundings.

18130 shown on optional spike and poles

Coloured Lenses	
<b>Product Code(s)</b>	20326 (blue), 20328 (red), 20327 (amber), 20329 (green)
<b>Material</b>	Plastic
<b>Colour</b>	Blue, red, amber or green
<b>Dimensions</b>	Diameter: 50mm
<b>Notes</b>	Not suitable for models 25015/16/19/20. Check product information for compatible fittings.

19887 (IP68)

Connector shown with driver

18627

1.5 metre extension lead with 3 plug sockets on end

18625

2 metre single plug extension cable

18626

20 metre single plug extension cable

### Guarantee / Life Expectancy

All landscape lighting fittings are guaranteed against structural failure for 5 years and 2 years for the LED units. The LED lamps have a minimum life expectancy at 80% plus efficiency for 20,000 hours. Typically if on 4 hours per day, 365 days per year, then this equates to around 14 years of life. The 2 year Guarantee is only valid when exclusively using Distinctive Lighting cables, fittings and drivers.

### Repair Service

Outside of the 2 year Guarantee we offer a chargeable full maintenance and repair service to fittings. This is conducted in our own workshops and the service includes replacement material parts and wiring repairs.

29875

4W (min. load 2W, max. load 4W)  
106mm L x 25mm W x 20mm D  
IP67

29874

11W (min. load 5W, max. load 11W)  
106mm L x 25mm W x 20mm D  
IP67

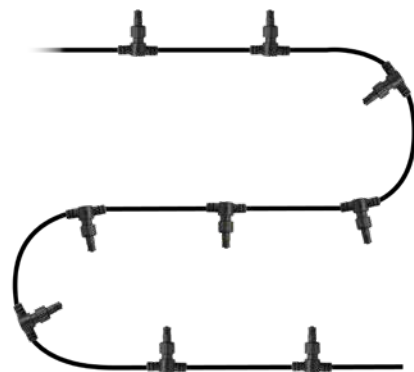

29876

28W (min. load 11W, max. load 28W)  
157mm L x 29mm W x 20mm D  
IP67

Drivers are supplied with 30cm of cable.  
Each fitting is supplied with 1.5m of cable.

**IMPORTANT:**  
All fittings should be plugged in prior to switching power on.

18152

cable set for plug & go fittings 6 metres long  
with 5 plugs spaced 1 metre apart for up to  
5 fittings

18153

cable set for plug & go fittings 10 metres long  
with 9 plugs spaced 1 metre apart for up to  
9 fittings

18154

cable set for plug & go fittings 16 metres long  
with 15 plugs spaced 1 metre apart for up to  
15 fittings

## LED LAMPS

- All lamps have an A+ Energy Rating and are guaranteed against failure for 2 years.
- All lamps are UV free, suitable for 220-240v and are NOT dimmable

### Edison E27 lamp

H: 140mm W: 64mm  
Wattage: 8W (60W equivalent)  
Colour temp.: 3000k (warm white)  
Expected Life: 25,000 hours  
Lumens: 800 Lm  
Switch Cycles: 12,500

AMBER  
GLASS

EDISON E27 LAMP  
Pack (x10) Code: 29655  
Single Code: 28606

### Classic E27 lamp

H: 105mm W: 60mm  
Wattage: 8W (60W equivalent)  
Colour temp.: 3000k (warm white)  
Expected Life: 25,000 hours  
Lumens: 800 Lm  
Switch Cycles: 12,500

CLASSIC E27 LAMP  
Pack (x10) Code: 29657  
Single Code: 28605

### Clear Globe E27 lamp

H: 135mm W: 95mm  
Wattage: 8W (60W equivalent)  
Colour temp.: 3000k (warm white)  
Expected Life: 25,000 hours  
Lumens: 800 Lm  
Switch Cycles: 12,500

CLEAR GLOBE E27 LAMP  
Pack (x5) Code: 29658  
Single Code: 28612

### White Globe E27 lamp

H: 135mm W: 95mm  
Wattage: 8W (60W equivalent)  
Colour temp.: 3000k (warm white)  
Expected Life: 25,000 hours  
Lumens: 800 Lm  
Switch Cycles: 12,500

WHITE GLOBE E27 LAMP  
Pack (x5) Code: 29664  
Single Code: 28613

## LED LAMPS

AMBER  
GLASS

**CANDLE E14 LAMP**  
Pack (x10) Code: 29656  
Single Code: 28602

**GOLF BALL E27 LAMP**  
Pack (x10) Code: 29659  
Single Code: 28604

**G9 LAMP**  
Pack (x25) Code: 29661  
Single Code: 27674

**GX53 LAMP**  
Pack (x10) Code: 29663  
Single Code: 29499

**GOLF BALL E14 LAMP**  
Pack (x10) Code: 29660  
Single Code: 28603

**GU10 LAMP**  
Pack (x10) Code: 29662  
Single Code: 27676

- All lamps have an A+ Energy Rating and are guaranteed against failure for 2 years.
- All lamps are UV free, suitable for 220-240v and are NOT dimmable

**Candle E14 lamp**  
H: 98mm W: 35mm  
Wattage: 4W (35W equivalent)  
Colour temp.: 3000k (warm white)  
Expected Life: 25,000 hours  
Lumens: 400 Lm  
Switch Cycles: 12,500

**Golf Ball E27 lamp**  
H: 72mm W: 45mm  
Wattage: 4W (35W equivalent)  
Colour temp.: 3000k (warm white)  
Expected Life: 25,000 hours  
Lumens: 400 Lm  
Switch Cycles: 12,500

**G9 lamp**  
H: 50mm W: 15mm  
Wattage: 3.5W (28W equivalent)  
Colour temp.: 3000k (warm white)  
Expected Life: 25,000 hours  
Lumens: 320 Lm  
Switch Cycles: 12,500

**GX53 lamp**  
H: 24mm W: 75mm  
Wattage: 9W (55W equivalent)  
Colour temp.: 3000k (warm white)  
Expected Life: 25,000 hours  
Lumens: 720 Lm  
Switch Cycles: 12,500

**Golf Ball E14 lamp**  
H: 78mm W: 45mm  
Wattage: 4W (35W equivalent)  
Colour temp.: 3000k (warm white)  
Expected Life: 25,000 hours  
Lumens: 400 Lm  
Switch Cycles: 12,500

**GU10 lamp**  
H: 58mm W: 50mm  
Wattage: 7W (50W equivalent)  
Colour temp.: 3000k (warm white)  
Expected Life: 25,000 hours  
Lumens: 620 Lm  
Switch Cycles: 12,500

\*Guarantee details on p212.

# TECHNICAL ADVICE & INFORMATION

---

## PRODUCT WARRANTIES/GUARANTEES

**GENERAL 2 YEAR GUARANTEE.** All fittings supplied from this catalogue, both interior and exterior, have a manufacturer's minimum guarantee of 2 years. This means that in normal and fair service, (and without incorrect or inappropriate installation or location), any product sold by Distinctive Lighting or its partners should have no fault develop within a minimum of 2 years from purchase. Any fault that is found is covered by guarantee to be repaired or replaced at the suppliers cost, within this period.

ALL Distinctive Lighting warranties/guarantees do not cover out of pocket expenses or consequential costs.

**LIMITED LIFETIME WARRANTY** – This warranty relates to certain ranges/models shown in this catalogue which are produced of materials that have an exceptionally long life expectation, such as solid brass lanterns. These fittings may age over time, but will not deteriorate to an extent where they will no longer function for the purpose intended. The "Limited" element relates to component parts such as rubber seals, lamp-holders etc. which are repairable but are not covered by the Lifetime warranty.

**15 YEAR WARRANTY AGAINST STRUCTURAL FAILURE** – Those models listed as having a 15 year warranty are guaranteed, that from purchase to within 15 years of normal use, the fittings will not deteriorate to any extent where they experience any structural failure. There may be signs of aging, corrosion or paint fading, but the integrity of the construction of these fittings means they will not deteriorate to any extent where they are rendered unusable within a lifetime of 15 years.

**2, 3, 5, AND 10 YEAR ANTI-CORROSION GUARANTEES** – Many outdoor fittings have anti-corrosion guarantees stated on each relevant page. This guarantee relates to the corrosion of paintwork on cast aluminium or steel fittings, and excludes locations within 5 miles of the coastline. Fittings that have been damaged, repainted or cleaned with an aggressive cleaner may be excluded.

Prior to agreeing to replace any fittings, the company reserves the right for the original seller or a representative of the company to inspect the damaged parts and for photographic evidence to be supplied.

**COASTAL LIGHTING 20 YEAR GUARANTEE** – These fittings are designed to be placed in the toughest of conditions including right by the coastline without exclusion. This guarantee covers protection of the finish against corrosion or UV degradation.

**COASTAL LIGHTING 5 YEAR ANTI-CORROSION GUARANTEE** – This guarantee relates to the corrosion of paintwork on composite parts. In the instance that fittings have been damaged, repainted or cleaned with an aggressive cleaner they may be excluded from the entitlement to a replacement. Prior to agreeing to replace any fittings, the company reserves the right for the original seller or a representative of the company to inspect the damaged parts and for photographic evidence to be supplied.

**LED MODULE AND PIR SENSOR GUARANTEES** – Within this catalogue there are a number of products incorporating PIR sensors or LED modules. Whilst the fittings themselves may have varying physical guarantees against corrosion, these electronic parts are covered by a 2 year guarantee against failure. After this period, they are still repairable and serviceable, either by the company or local supplier.

## GENERAL NOTES

**1. FINISHES.** Many of the finishes used on these ranges are hand applied (patinated) and some small variations and irregularities in the finish are to be expected from fitting to fitting. This is part of the process of manufacture and, far from being a problem, it is an important part of the nature of hand made and hand finished items. In particular, fittings with the Old Painted Bronze (OPB) finish will vary between ranges, which may appear quite significant, as they come from a number of different manufacturers.

**2. LAMP-HOLDER TYPES.** Most fittings are constructed with either E14 lamp-holders (small Edison screw, sometimes referred to as SES or with E27 lamp-holders (standard Edison screw, sometimes referred to as ES. Appropriate E14 and E27 lamps are widely available in a range of styles, wattages and light sources including incandescent, compact fluorescent and LED. Some of these lamp-holders are now supplied with threaded skirts, together with candle tubes and shade rings. This means that these products can be used either as a fitting with candle tubes and candle lamps, or with glass using the shade ring. Additionally we make certain fittings which use G9 and GX53 lamps. Lamps are usually supplied with these fittings.

**3. WATTAGES.** Most fittings shown in the catalogue are shown with Maximum Wattage recommendations. These recommendations are calculated mainly by heat capability, as there is a correlation between heat and wattage. However, in many countries traditional incandescent lamps, such as 100W GLS are no longer available. There are now many new versions of lamps in the market, lower wattage but similar light performance such as halogen replacement, compact fluorescent and LED. Most fittings wattage capacity and certification has been based on the criteria using an Incandescent lamp and so when choosing lamps, please take care to ensure that wattages specified are of no more than the equivalent original incandescent lamps. In the case of LED, the wattages are far lower, but some of these can still run very hot, not dissimilar to incandescent of much higher power.

**5. FLUSH CONVERT/DUAL MOUNT.** A few of the chain models are constructed so that they can be easily modified from a chain fitting into a semi-flush fitting. Note that once converted to semi-flush it is not then possible to easily convert back to a chain fitting, as some re-wiring is likely to be required.

**6. CUSTOMISATION.** Some of our ranges supplied in matt black can be relatively easily patinated into finishes such as Black/Gold, Black/Copper etc. Equally, for chain suspended fittings that need extra chain and cable, these can also be relatively easily undertaken. Both such modifications may incur longer lead times and will have small additional costs added to the price. (See current Terms and Conditions.). Beyond this, with appropriate lead time and client budget, more specialised changes can be undertaken such as different colours completely, changes to dimensions and design modifications and even fully bespoke fittings can be considered due to our varied manufacturing resources available.

## EXTERIOR FITTINGS

**1. INSTALLATION CARE AND MAINTENANCE.** When installing all outdoor lights it is recommended to lightly grease all threaded parts and screws / nuts to ensure that fittings can easily be disassembled for cleaning or lamp replacement. When handling certain fittings / finishes such as polished copper they can easily finger mark, so it is recommended that bare hands on these surfaces is kept to a minimum. Please retain receipt and installation instructions for future reference.

**2. FINISH MAINTENANCE.** Many of our fittings are supplied in a natural finish, i.e. Polished Copper un-lacquered and Teak wood. These fittings can naturally age over time or to maintain their original appearance, treatment is needed, such as oil for teak, beeswax for brass and light oil for Copper and Stainless Steel. When handling finishes during maintenance, small marks may show which can be easily polished away if required. The alternative is to allow the material to age

and weather naturally, which does no harm to the fitting. Additionally, when installing cast aluminium fittings, a light coating of beeswax or oil can give the finish extended life, especially when in coastal areas. For all models, we highly recommend that exterior fittings are cleaned once per year with fresh water and oiled or waxed to give longer service. Lenses and glasses also benefit from cleaning but take care with polycarbonate or acrylic as these materials can easily scratch if any abrasive cloth is used.

**3. IP RATINGS.** All exterior fittings have an IP (Ingress Protection) rating which is a declaration of how much protection any product has against the ingress of both water and dust / particles. The minimum rating for an outdoor luminaire exposed to rain should be IP23 and the maximum can be up to IP68 (this can vary in different countries) which means the fitting is submersible. Most of our fittings are IP44 or greater and some of the Landscape models are up to IP67 meaning they can be covered by water up to a depth of 150mm, such as in-ground lights. See table below for full classifications. Typically, the higher the numbers, the higher the performance.

## IP RATINGS

1st Digit	Short Description (Protection against ingress of solid bodies)	2nd Digit	Short Description (Protection against ingress of moisture)
0	Non-Protected	0	Non-protected
1	Protected against solid objects greater than 50mm dia.	1	Protected against dripping water falling vertically greater than 50mm diameter
2	Protected against solid objects greater than 12mm dia.	2	Protected against dripping water when the Luminaire is tilted up to 15° from its normal position
3	Protected against solid objects greater than 2.5mm dia.	3	Protected against spraying water falling on the Luminaire at any angle up to 60° from the vertical
4	Protected against solid objects greater than 1mm dia.	4	Protected against splashing water from any angle
5	Dust-protected	5	Protected against water jets from any direction
6	Dust-tight	6	Protected against powerful water jets
		7	Protected against immersion in water under defined conditions
		8	Protected against continuous submersion under manufacturers specified conditions
Example IP65 Dust-tight and protected against water jets from any direction.			

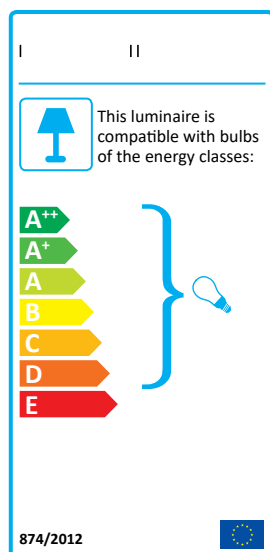

## COMPLIANCE/APPROVALS

All products within this catalogue conform with the European Union Low Voltage Directive, BS EN 60598-1:2008, the product standard for luminaires recognised across Europe and all fittings are CE marked. Every luminaire is individually tested to ensure that the product is electrically sound and meets the company's quality standards. A unique test / batch number is then applied to the fitting. Please contact us for further details or advise us of your local needs.

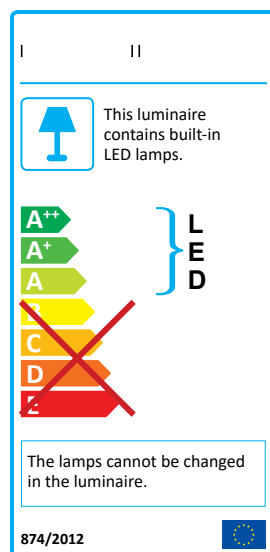

We are manufacturing members of the UK Lighting Industry Association and conform to all aspects of the Lighting Industry Association Code of Practice for luminaire production.

## ENERGY RATINGS FOR LUMINAIRES

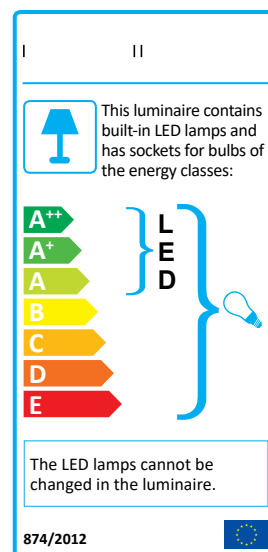

Please see the relevant energy rating label for the corresponding lamp holder type. Please note that, with the very large number of lamp options available in the market, it is impossible for our luminaires to accurately reflect all choices. But all lamps able to be bought in the market should have their own dedicated energy rating performance clearly stated on their packaging.

All luminaires with replaceable lamps. Incandescent, fluorescent or LED.

Dedicated LED fittings.

Some of our luminaires combine built-in LED with replaceable lamps.
